DEVELOPMENT IN GIDGEGANNUP – PROVISION OF SCHEME WATER

In response to your letter dated 15 September 2008, I advise that the provision of the water supplies to Gidgegannup to facilitate proposed urban development has not progressed.

At this stage, only conceptual plans have been provided to the Water Corporation and, as yet, no water supply planning has been commenced.

The planning and design of a water supply scheme will be undertaken by the proponents of the proposed Gidgegannup development, and until this occurs, the Water Corporation is not in a position to advise whether or not the water will be supplied through mains or reticulation services, or the route of the service, and the timeframe for construction

It is likely that the water supply will connect into the water supply pipeline in Mount Helena, but this has not been confirmed.

The Water Corporation has had initial discussions with the consultants representing the proponent, in regard to the provision of water and sewer services to Gidgegannup, should the proposal proceed.

Currently, the Gidgegannup townsite and the surrounding area is zoned rural under the Metropolitan Region Scheme and, until the land is re-classified urban, the servicing requirements are unlikely to be progressed further.

I trust this is satisfactory.
